

## **Amendments to the Claims**

This listing of claims will replace all prior versions, and listings, of claims in the application.

### **Listing of Claims:**

1. - 47. (cancelled)

48. (new) A method of treating or preventing a microbe-caused disease of at least one of skin, a mucous membrane and an oral cavity, wherein the method comprises an administration to a subject of oil of coriander in an amount which is effective for treating or preventing the microbe-caused disease.

49. (new) The method of claim 48, wherein the administration comprises a topical administration to skin.

50. (new) The method of claim 48, wherein the administration comprises a topical administration to a mucous membrane.

51. (new) The method of claim 48, wherein the administration comprises a topical administration to an oral cavity.

52. (new) The method of claim 48, wherein the microbe-caused disease is caused by gram-

positive bacteria.

53. (new)      The method of claim 48, wherein the microbe-caused disease is caused by at least one of yeast-like fungi and viruses.

54. (new)      The method of claim 48, wherein the microbe-caused disease comprises at least one of a bacterial infection of the skin, a fungal infection of the skin, and a microbe-infected dermatose.

55. (new)      The method of claim 54, wherein the microbe-caused disease comprises at least one of pyoderma, folliculitis, disease impetigo, erysipelas, a mycose or mold infection, and tinea.

56. (new)      The method of claim 54, wherein the microbe-caused disease comprises at least one of atopic dermatitis, microbial eczema, chronic eczema of hands, psoriasis, prurigo, and acne.

57. (new)      The method of claim 48, wherein the microbe-caused disease comprises at least one of a microbe-caused disease of a mucous membrane, and a viral disease of a mucous membrane.

58. (new)      The method of claim 57, wherein the microbe-caused disease comprises stomatitis.

59. (new)      The method of claim 57, wherein the microbe-caused disease comprises at least one of aphthae and herpes labialis.

60. (new) The method of claim 48 wherein the microbe-caused disease is associated with at least one of Methicillin-resistant *Staphylococcus aureus* (MRSA) and a multi-resistant pathogen.

61. (new) The method of claim 48, wherein oil of coriander or a composition comprising oil of coriander is administered to a contact site of the microbial disease with the oil of coriander and is allowed to exert an effect for a period of time which is sufficient for effecting a therapy of the microbial disease.

62. (new) The method of claim 48, wherein the oil of coriander is used in a form of at least one of a solution, a spray, a tincture, an oil-in-water emulsion, and a water-in-oil emulsion.

63. (new) The method of claim 48, wherein the oil of coriander is used in a form of at least one of an ointment, a lotion, a cream, a paste, and a powder.

64. (new) The method of claim 48, wherein the oil of coriander is used in a form of at least one of a chewing mass, a chewing gum, a cellulose film, a film strip, candy, and a pastille.

65. (new) The method of claim 48, wherein the oil of coriander is used in pure form.

66. (new) The method of claim 48, wherein the oil of coriander is used as a composition which comprises from 0.1 % to 10 % by weight of oil of coriander, based on a total weight of the

composition.

67. (new) The method of claim 48, wherein the oil of coriander is used as a composition which comprises from 1 % to 7 % by weight of oil of coriander, based on a total weight of the composition.

68. (new) The method of claim 48, wherein the oil of coriander is used in combination with one or more substances selected from substances inhibiting inflammation and substances having an antimicrobial effect.

69. (new) A method of treating or preventing a microbe-caused disease of at least one of skin and a mucous membrane, wherein the method comprises a topical administration to a subject of oil of coriander in an amount which is effective for treating or preventing the microbe-caused disease, the oil of coriander being administered in pure form or as a composition which comprises oil of coriander.

70. (new) The method of claim 69 wherein the microbe-caused disease is associated with at least one of Methicillin-resistant *Staphylococcus aureus* (MRSA) and a multi-resistant pathogen.

71. (new) The method of claim 69, wherein the oil of coriander is used in a form of at least one of a solution, a spray, a tincture, an oil-in-water emulsion, a water-in-oil emulsion, an ointment, a lotion, a cream, a paste, a powder, a chewing mass, a chewing gum, a cellulose film, a film strip,

P30391.A06

candy, and a pastille.
